The Moon orbits Earth. The Moon's shape seems to change during its four-week lunar cycle.

**主題思想**

3 ES 4.b 3 ES 4.d

月球環繞地球運轉。在為期四週的月球運轉週期中，月球的形狀似乎會產生變化。

The changing shapes of the Moon are called **phases**. (p. 200-201)

月球的形狀變化稱為**月相**。  
(第 200-201 頁)

The Moon's shape seems to change because we see different amounts of its lit side. (pp. 202-203)

月球的形狀似乎會產生變化，因為我們所看到它被照亮的一邊的大小不同。  
(第 202-203 頁)

A lunar **eclipse** occurs when the Moon moves into Earth's shadow. (p. 204)

當月球移到地球的陰影當中時，就會產生**月蝕**。  
(第 204 頁)
