Main Idea 4 ES 4.a

Different processes that take place on Earth form many different kinds of rocks. Igneous rocks may be formed above the ground or below the ground.

主題思想 4 ES 4.a

地球上發生的不同過程，形成了許多不同種類的岩石。火成岩可能在地面上或地底下形成。

Igneous rocks are formed from magma or lava that cools and hardens. (pp. 152-153)

火成岩是由冷卻後變硬的岩漿或熔岩所形成。
(第 152-153 頁)

Where an igneous rock is formed and the minerals that make it up determine its **properties**. (pp. 154-155)

火成岩的形成地點以及構成火成岩的礦物質，決定了火成岩的**特性**。
(第 154-155 頁)

Igneous rocks have many important **uses**. (p. 156)

火成岩有許多重要的**用途**。
(第 156 頁)
