Main Idea

4 ES 5.a 4 ES 5.c.

The movement of weathered rock from one place to another is called erosion. As wind and water move rock from one place to another, the shape of the land changes.

主題思想 4 ES 5.a 4 ES 5.c.

風化的岩石從一個地方移到另一個地方，就稱為侵蝕。因為風和水會將岩石從一個地方移動到另一個地方，所以地形就會改變。

Erosion and **deposition** move sediments from one **place** on Earth's surface to another. (pp. 204-205)

侵蝕和沉積作用會將沉積岩從地表的一個地方移動到另一個地方。(第 204-205 頁)

Erosion is affected by soil type, sediment size, and wind and water strength. (pp. 206-207)

侵蝕會受到土壤的種類、沉積岩的大小以及風和水的力量所影響。(第 206-207 頁)

There are methods farmers can use to conserve soil. (p. 208)

農夫可以採用某些方法來做好水土保持。(第 208 頁)
