Main Idea 4 PS 1.e
Some particles of matter have a negative or positive charge. Opposite charges attract each other. Like charges repel each other.

主題思想 4 PS 1.e
某些物質粒子帶有負電或正電。異性電荷會相吸。同性電荷會相斥。

Electrical charges can be negative or positive. Opposite charges attract each other. Like charges repel each other.
(pp. 286–287)

電荷分為負電或正電。異性電荷會相吸。同性電荷會相斥。
(第 286–287 頁)

Static electricity is a build up electrical charges. A discharge is a movement of static electricity. (pp. 288–291)

靜電是指累積的電荷。放電是指靜電的移動。
(第 288–291 頁)

Electrical charges pass easily through **conductors** but not through **insulators**.
(p. 292)

電荷可輕易地通過**導體**，但卻無法通過**絕緣體**。
(第 292 頁)
