

English

Chinese

Main Idea 5 ES 4.a
 When air is heated unevenly it moves around, causing winds and air currents.

主題思想 5 ES 4.a
 空氣溫度分佈不均勻時，就會四處移動並且生成風和氣流。

The Sun heats Earth's **atmosphere** unequally. (pp. 244-245)

太陽會對地球的大氣層不均勻地加熱。(第 244-245 頁)

Air moves from an area of **high pressure** to an area of **low pressure**. (pp. 246-247)

空氣會從**高氣壓**地區向**低氣壓**地區移動。(第 246-247 頁)

Global winds are predictable, blow steadily, and blow over long distances. (p. 248)

全球風是可預測的風，會穩定地吹過很長的一段距離。(第 248 頁)
