

English

Hmong

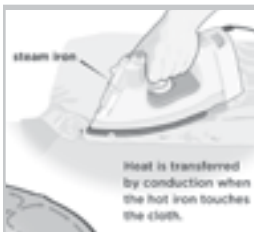

Main Idea 6 PS 3.c
Heat flows in solids by conduction and in fluids by conduction and convection.

Niam Tswvyim 6 PS 3.c
Cua kub ntws hauv cov cev khov raws kev txeeem thiab hauv cov cev kua raws kev txeeem thiab nyam.

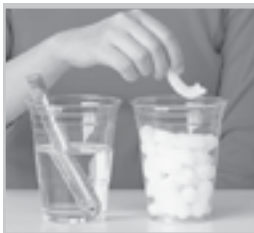

Conduction is the movement of energy through direct contact. (p. 195)

Kev **txeeem** yog ib txoj kev ntab ntws ntawm lub zog raws kev sib tim. (p. 195)

Convection is the transfer of energy by the flow of a liquid or a gas. (p. 197)

Kev **nyam** yog kev xa zog raws kev ntab ntws ntawm ib lub cev kua lossis lub cev cua. (p. 197)

Thermal conductivity is the property that enables conductors to absorb heat. (p. 198)

Kev **kub txeeem** yog ib fab nrog cev uas pab cov cev txeeem txais cua kub. (p. 198)
